CITY OF DRIGGS
OFFICE OF THE MAYOR

July 8, 2026

Dear City of Victor Council President and Council Members,

As of July 8, 2026, the litigation in *Victor v. Driggs* has been dismissed, recorded, and finalized. We recognize this as an important step toward renewed cooperation, and the City of Driggs appreciates your willingness to move forward.

We would like to invite the Victor City Council to participate in joint worksessions with the Driggs City Council. These conversations will help us better understand Victor's priorities and identify a collaborative path toward addressing the long-term needs of our shared wastewater treatment system.

Upon your acceptance, we will provide a draft agreement intended solely as a starting point for discussion.

We propose holding the first joint meeting in Driggs and the second in Victor, with additional worksessions scheduled as needed. While summer is a busy time for both communities, beginning this dialogue soon will support steady progress. Please let us know what dates align best with your council's schedule.

Thank you for your consideration. We look forward to continuing this work together.

Best,

August Christensen and Driggs City Council members

CITY OF VICTOR
OFFICE OF THE MAYOR

July 15, 2026

Dear Mayor Christensen,

Thank you for your invitation and for meeting with me on Monday. I appreciate the opportunity to begin a new chapter in the relationship between our two cities, and I share your desire to move this conversation forward productively and efficiently. Victor is committed to exploring a long-term wastewater partnership and remains open to identifying the strongest framework for achieving that objective with Driggs.

To avoid negotiating as adversaries, I'm cautious about reviewing your draft agreement with Council before we have a clearer and more complete understanding of the system we are being asked to commit to. Because of the complexity of this infrastructure, particularly because it is my understanding that much has changed since Victor last evaluated it, taking time to establish a shared understanding of foundational issues (not only for Council but for our citizens) is essential before we can thoughtfully evaluate the terms of any future agreement,

This foundation should include the current status and design of the plant improvements, anticipated capacity and regulatory requirements, financing and debt assumptions, grant funding, projected costs to both communities, and the governance options available to us. My hope is that our elected councils can then focus on establishing policy direction and guiding principles while relying on subject-matter experts to provide information, analyze alternatives, and help us understand the choices before us.

I would therefore suggest that a first step could be an informational work session focused on the plant and the current technical, financial, and regulatory assumptions underlying the project. Our council is available to do this jointly on Wednesday, July 29. Alternatively, Driggs representatives and technical experts could provide an initial presentation to the Victor City Council only as early as our regularly scheduled July 22 meeting. Our agenda is generally finalized by the end of the day tomorrow, July 16. Our next regular meeting is August 12.

For the broader discussions that follow, several council members and community members have expressed a preference for dedicated joint work sessions that provide the time and focus needed for meaningful progress. It may also be helpful to hold those meetings in a neutral location under mutually agreed-upon procedures that encourage balanced participation and shared ownership of the process.

Once both councils have a stronger shared understanding of the project and the issues before us, we will be in a much better position to discuss governance, long-term commitments, and the appropriate framework for an agreement.

Thank you again for reaching out. I am optimistic about our ability to move forward thoughtfully and collaboratively, and I look forward to continuing the conversation.

Sincerely,

Sue Muncaster

Mayor

City of Victor
