MEMORANDUM

TO: Mayor August Christensen and Driggs City Council

FROM: Mayor Sue Muncaster, City of Victor

DATE: September 30, 2026

SUBJECT: Written Confirmation of Downstream Capacity and Pending Consent-to-Connect Requests

PURPOSE:

Victor requests immediate written confirmation from Driggs regarding available capacity in the Driggs collection/conveyance system and wastewater treatment plant, together with written approval of Victor's pending will-serve/consent-to-connect requests under the 2011 Inter-City Agreement.

BACKGROUND:

Victor has submitted written requests for Driggs' consent for connections associated with current Victor development. These requests were tabled, and Victor has not yet received written approval, denial, or a date certain for final action. Victor must continue responding to developers who need reliable information about whether wastewater service will be available for projects already moving through the development process.

Victor can determine whether capacity exists within its own collection system. We cannot independently certify capacity in the downstream Driggs facilities that receive and treat Victor's wastewater. During our recent conversation, Mayor Christensen stated that she is not concerned about capacity; Driggs public works staff has also verbally assured Victor in the past. We appreciate that assurance; we now need it confirmed in writing so City staff and developers can reasonably rely on it.

REQUESTED ACTION

Please provide written capacity confirmation and action on the pending consent-to-connect requests as soon as possible. If Council action is required, Victor requests confirmation that the matter be placed on the next available Driggs City Council agenda. If additional engineering analysis is necessary, please identify exactly what is needed and the earliest date it can be completed.

WHY THIS IS URGENT

Victor continues to use and pay for wastewater treatment service under the existing agreement, and development decisions are being made now. Until Driggs provides a written downstream capacity determination, Victor is not comfortable representing to developers that their projects can be served beyond Victor's collection system.

Respectfully,

Sue Muncaster

Sue Muncaster

Mayor, City of Victor
